

Integrate React with Bootstrap

Let's Make our Page Beautiful

Before

Bootstrap

After

Your Todo's		
#	Description	Assigned
1	Feed dog	Eric
2	Get haircut	Eric

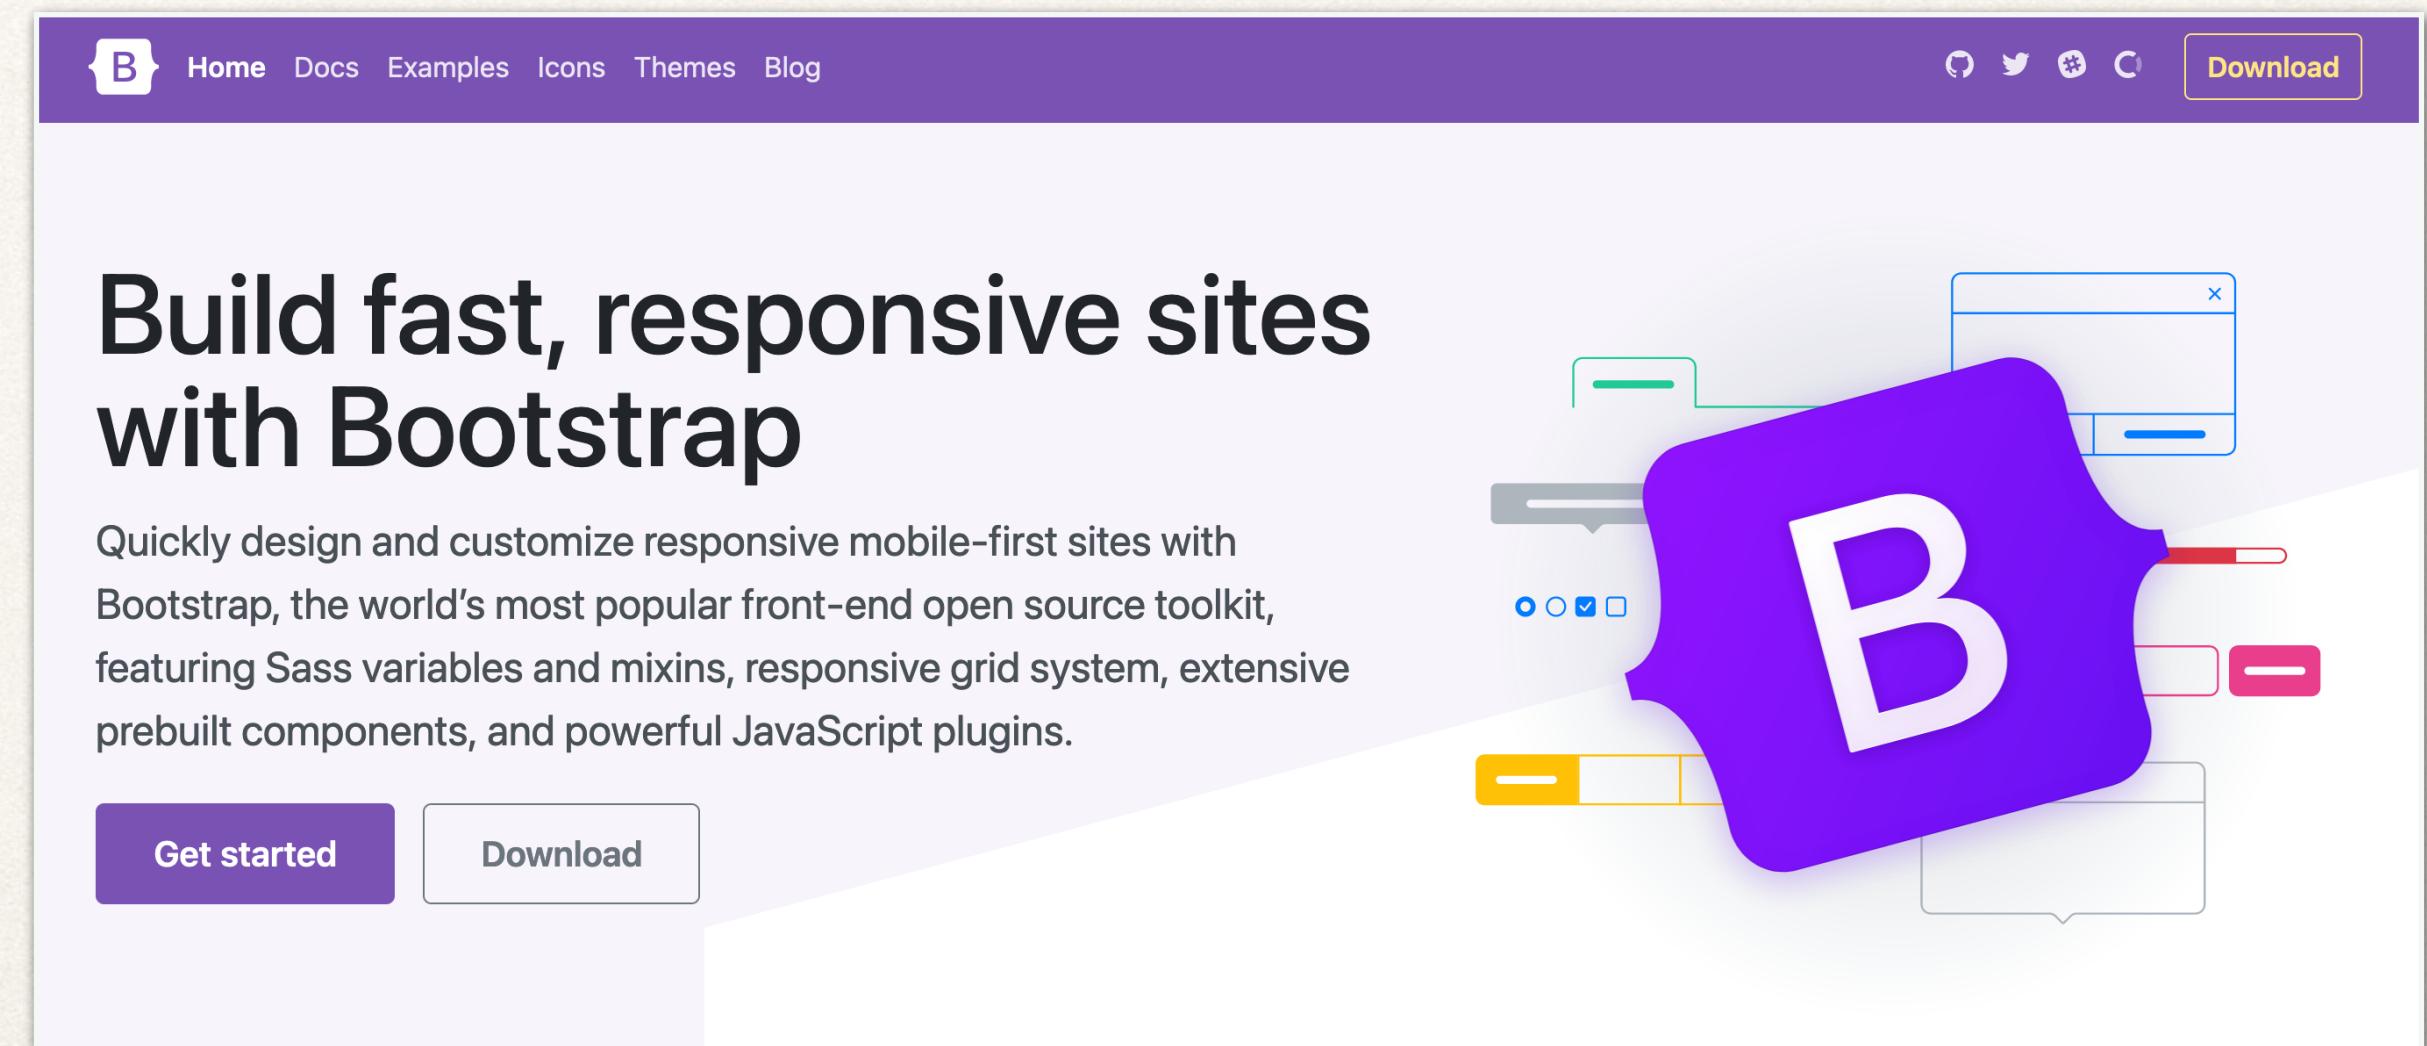

Development Process

Step-By-Step

1. Get links for remote Bootstrap files
2. Add links to index.html
3. Apply Bootstrap CSS styles in component HTML template
4. Apply Bootstrap CSS styles in component HTML table

Step 1: Get links for remote Bootstrap files

- Visit Bootstrap website: www.getbootstrap.com
- Website has instructions on how to **Get Started**

Step 2: Add links in index.html

```
<head>
...
<!-- Bootstrap CSS -->
<link rel="stylesheet" href="https://cdn.jsdelivr.net/npm/bootstrap@x.y.z/dist/css/bootstrap.min.css" ...>
...
</head>
```

Version number

```
...
<!-- Bootstrap JS Dependencies -->
<script src="https://cdn.jsdelivr.net/npm/bootstrap@x.y.z/dist/js/bootstrap.bundle" ...>
...
</body>
```

Version number

Step 3: Apply CSS in Component HTML template

File: src/app.js

```
<div className="container">  
  <div className="card"> </div>  
</div>
```

Bootstrap CSS style

#	Description	Assigned
1	Feed dog	Eric
2	Get haircut	Eric

Step 4: Apply CSS in Component HTML Table

File: src/app.js

```
<table className="table table-hover">  
  
  <thead>  
    <tr>  
      <th>#</th>  
      <th>Description</th>  
      <th>Assigned</th>  
    </tr>  
  </thead>  
  
  <tbody>  
    ...  
  </tbody>  
</table>
```
